

Weekly Plans and Notes (07/05 – 07/09)

- **Weather:** We have finally received some much needed rain. Just over an inch of rain for the week. Please make sure that your rain sensor is still turned on and working properly.
- **Irrigation:** Remember irrigation is a supplement to rainfall not a replacement of it.
 - Tip: Adjusting the seasonal setting on your Controller ups the watering time on ALL zones. When you may just need to adjust the time in one zone.
 - We are continuing to make repairs throughout the community. We have checked out Pump 2 and will be adjusting run times accordingly.
- **Maintenance:** Monday (7/05) we observed the 4th of July Holiday. We have had 2 days this week where we have ended early due to the rain. What streets we do not complete will be completed first next week.
 - **Edging:** We will be edging the beds next week.
- **Turf Application:** The third round of turf application is has been scheduled. It will begin near the End of July. We have pushed it back due to the heat stress and low rainfall.
- **Pruning:** We will be pruning the Main Entrance next week along with the Model village.
